SUCCESSFUL ACCREDITATION OF OUR CALIBRATION LABORATORY

KIWASCO becomes the second water utility in Kenya to have its calibration laboratory fully accredited by KENAS (Kenya Accreditation Service). This enables the company to perform water meter calibration services both at our permanent Calibration Laboratory (Test Bench) and at the customers' premises. The certificate was received upon satisfying the **ISO/IEC 17025:2017** general requirements for the competence of testing and calibration laboratories.

This means that KIWASCO will now offer; meter test and calibration services at a fee, training services on meter testing and calibration to other WSP's and industries and also allow industrial attachments from learning institutions.

Other than the services, it also enables us to build stakeholders confidence as far as the meter management is concerned. customer focus is one of our core values. This is just a taste of what we have for our stakeholders'.

Hongera to the team who worked tirelessly to make this come true.
